Baltimore, MD 21244

RE: Updated Definition of Qualified Speech-Language Pathologist

Dear Administrator Oz:

The undersigned speech-language pathologists (SLPs)—who treat and care for Medicare beneficiaries—and impacted members of the public write to urgently request the Centers for Medicare & Medicaid Services (CMS) revise its interpretation of the term “licensure” to include the provisional licensure states issue to new graduates in the process of completing their supervised clinical mentorship. Failure to act quickly jeopardizes access to care for Medicare beneficiaries and undermines state laws designed to regulate provisional licensees such as speech-language pathology clinical fellows (CFs). It also threatens the livelihood of CFs whose employment relies on the ability to submit claims to payers like Medicare.

Specifically, in an MLN Matters article (MM13922) released in April 2025, CMS updated Section 230.3.B. of Chapter 15 of the Medicare Benefit Policy Manual to reflect a change in the definition of a qualified SLP made in 2015. This change is significant in several critical ways:

1. It added a requirement for licensure, but does not include provisional licensure;
2. It removed the reference to a qualified SLP standard that stated the SLP would meet the regulatory requirements if they had completed the educational requirements for the Certificate of Clinical Competence and were in the process of completing the supervised experience, known as the clinical fellowship; and
3. It specifically requires that, if the state does not license SLPs, the SLP would meet the qualified definition if they met several requirements, including the completed nine-month supervised experience.

We are extremely concerned CMS’ interpretation of licensure—which excludes provisional licensure—fails to recognize that no state that provides a provisional license creates a distinction in the scope of practice between a provisionally licensed SLP and a “fully” licensed SLP. Therefore, provisional licensees can perform the same full scope of speech-language pathology clinical practice, including evaluation and treatment of speech, language, swallowing, and cognitive disorders, as their “fully” licensed counterparts.

CMS’ interpretation also jeopardizes Medicare beneficiaries’ access to care. Approximately 10,000 new graduates enter into a clinical fellowship each year, and CMS’ determination that they do not meet the definition of a qualified SLP means that appointments will at best be delayed or more likely canceled as employers seek to come into compliance. A sudden shift in this personnel standard threatens employment for nearly 10,000 SLPs.

Thank you for your timely attention to this manner. We are committed to partnering with CMS to ensure Medicare beneficiaries receive high-quality care from qualified clinicians, including provisional licensees.

Sincerely,

Petition Signatories
