Making effective communication,
a human right, accessible and
achievable for all.

DEFINING THE PROFESSIONALS

Audiologists specialize in assessing and preventing hearing, balance and other related disorders, as well as treatment of those disorders.

Speech-language pathologists (SLPs) identify, assess, and treat speech, language, voice, cognitive communication, and swallowing disorders.

Audiologists and SLPs provide diagnostic and treatment services to people of all ages, from infants to older adults.
