2023 Member and Affiliate Profile

Overall Counts

ASHA currently represents 234,244 members and affiliates: audiologists; speech-language pathologists (SLPs); speech, language, and hearing scientists; audiology and speech-language pathology assistants; and undergraduate, graduate, and doctoral students in communication sciences and disorders (CSD) who are members of the National Student Speech Language Hearing Association (NSSLHA). ASHA's membership and affiliation grew by 5,876 people in 2023—a 2.6% increase from the previous year.

Counts by Certification, Membership, and Affiliation Status

- **Audiologists, SLPs, and Speech, Language, and Hearing Scientists.** Excluding assistants and National NSSLHA members, ASHA represents 223,057 CSD professionals—up from 217,135 at year-end 2022 (a 2.7% increase).
- **Certified Audiologists.** ASHA represents 14,059 audiologists—up slightly from 14,029 at year-end 2022 (a 0.2% increase). Most (93.6%) audiologists are certified members.
- **Certified Speech-Language Pathologists.** ASHA represents 206,126 SLPs—up from 199,942 at year-end 2022 (a 3.1% increase). Most (98.4%) SLPs are certified members.
- **Individuals With Dual Certification.** ASHA represents 645 individuals who hold certification in both audiology and speech-language pathology—down from 683 at year-end 2022 (a 5.6% decline). Individuals with dual certification are counted separately from individuals certified in audiology or speech-language pathology only.
- **Individuals With Certification in Process.** The number of individuals who have started—but not yet completed—the certification process is 1,747—down from 1,855 at year-end 2022 (a 5.8% decline).
- **Members Only.** Only 393 ASHA members do not hold certification—down slightly from 399 at year-end 2022 (a 1.5% decrease).
- **International Affiliates.** ASHA represents 575 CSD professionals from 67 countries outside the United States—compared to 610 professionals from 63 countries at year-end 2022 (a 5.7% decrease).
- **Certified Assistants.** ASHA represents 881 assistants—up significantly from 672 at year-end 2022 (a 31.1% increase). Of these, 44 are certified in audiology, 786 are certified in speech-language pathology, and 51 have started—but not yet completed—the Assistants Certification Program.
- **National NSSLHA Members.** ASHA represents 10,306 students who are members of National NSSLHA—down slightly from 10,482 at year-end 2022 (a 1.7% decrease).

Demographics

- **Gender.** Overall, most (95.6%) ASHA members and affiliates self-identify as female—virtually unchanged from 95.7% at year-end 2022. About 12.4% of audiologists, 3.5% of SLPs, and 16.1% of those with dual certification self-identify as male.
- **Race and Ethnicity.** About 9.5% of ASHA members and affiliates self-identify as racially minoritized groups. Additionally, 7.0% of ASHA members and affiliates self-identify as Hispanic, Latina, Latino, Latinx, or as being of Spanish origin. In contrast, 38.4% of the U.S. population self-identify as racially minoritized groups; 18.7% self-identify as Hispanic or Latino ([U.S. Census Bureau, 2020](#)).
- **Age.** ASHA members and affiliates who are age 34 and younger (27.2%) and age 35–44 (28.7%) make up over half of the Association, followed by those who are age 45–54 (22.8%), 55–64 (12.8%), and 65 and older (8.4%).
- **Disability.** About 2.4% (5,466) of ASHA members and affiliates self-identify as having a disability. Of these, 1.2% (2,712) self-identify as having a speech-language disability, 0.7% (1,522) a mental or emotional disability, 0.4% (984) an auditory disability, 0.3% (746) a motor-mobility disability, and 0.1% (309) a visual disability.

Employment Characteristics

- **Employment Status.** Overall, most (74.8%) ASHA members and affiliates work full time; 16.0% work part time. Only 1.2% are unemployed and seeking work.
- **Primary Employment Facility—Audiologists.** Most (75.4%) audiologists work in health care settings, including hospitals and residential and nonresidential health care facilities. Most of the remainder work in either schools (7.1%) or colleges/universities (6.2%).
- **Primary Employment Facility—SLPs.** About half (49.9%) of SLPs work in schools. Most of the remainder (40.4%) work in either health care settings, including hospitals and residential and nonresidential health care facilities, or colleges/universities (2.4%).
- **Private Practice.** About 31.8% of audiologists and 23.5% of SLPs work full or part time in private practice.
- **Primary Employment Function.** About 78.1% of audiologists and 75.7% of SLPs are clinical service providers. Most of the remainder are special education teachers, college/university professors, researchers, administrators, or consultants.

Note: The above demographic and employment data exclude National NSSLHA members.

2022 Member and Affiliate Profile

Overall Counts

ASHA currently represents 228,368 members and affiliates: audiologists; speech-language pathologists (SLPs); speech, language, and hearing scientists; audiology and speech-language pathology support personnel; and undergraduate, graduate, and doctoral students in communication sciences and disorders (CSD) who are members of the National Student Speech Language Hearing Association (NSSLHA). ASHA's membership and affiliation grew by 4,912 people in 2022—a 2.2% increase from the previous year.

Counts by Membership or Affiliation Status

- **Audiologists, SLPs, and Speech, Language, and Hearing Scientists.** Excluding assistants, associates, and National NSSLHA members, ASHA represents 217,135 CSD professionals—up from 212,534 at year-end 2021 (a 2.2% increase).
- **Audiologists.** ASHA represents 14,029 audiologists—up from 13,910 at year-end 2021 (a 0.9% increase). Most (93.5%) audiologists are certified members.
- **Speech-Language Pathologists.** ASHA represents 199,942 SLPs—up from 193,799 at year-end 2021 (a 3.2% increase). Most (98.7%) SLPs are certified members.
- **Individuals With Dual Certification.** ASHA represents 683 individuals who hold certification in both audiology and speech-language pathology—down from 707 at year-end 2021 (a 3.4% decline).
- **Individuals With Certification in Process.** The number of individuals who have started—but not yet completed—the certification process is 1,855—down substantially from 3,721 at year-end 2021 (a 50.1% decline). The drop in "in process" numbers is mostly due to the large number of individuals who applied for certification prior to the recent standards change and successfully completed their CF/earned their certification in 2022 after having their CF experience affected or delayed due to the pandemic in 2020 and/or 2021.
- **Members Only.** Only 399 ASHA members do not hold certification—up from 354 at year-end 2021 (a 12.7% increase).
- **International Affiliates.** ASHA represents 610 CSD professionals from 63 countries outside the United States—up from 541 professionals from 61 countries at year-end 2021 (a 12.8% increase).
- **Certified Assistants.** ASHA represents 672 assistants—up from 446 at year-end 2021 (a 50.7% increase). Of these, 31 are certified in audiology, 576 are certified in speech-language pathology, and 65 have started—but not yet completed—the Assistants Certification Program.

- **Associates.** ASHA represents 79 associates—down substantially from 135 at year-end 2021 (a 41.5% decline). This may be largely due to the Assistants Certification Program that was initiated in 2021 and the sunset of the Associates Program in December 2022.
- **National NSSLHA Members.** ASHA represents 10,482 students who are members of National NSSLHA—up from 10,341 at year-end 2021 (a 1.4% increase).

Demographics

- **Sex.** Overall, most (95.7%) ASHA members and affiliates self-identify as female—up slightly from 95.6% at year-end 2021. About 13.1% of audiologists, 3.6% of SLPs, and 16.4% of those with dual certification self-identify as male.
- **Race and Ethnicity.** About 8.9% of ASHA members and affiliates self-identify as racially minoritized groups. Additionally, about 6.4% of ASHA members and affiliates self-identify as Hispanic or Latino. In contrast, 38.4% of the U.S. population self-identify as racially minoritized groups; 18.7% self-identify as Hispanic or Latino ([U.S. Census Bureau, 2020](#)).
- **Age.** ASHA members and affiliates who are age 35–44 make up the largest share of the Association (28.9%), followed by those who are age 34 and younger (26.2%), 45–54 (23.2%), 55–64 (13.1%), and 65 and older (8.6%).

Employment Characteristics

- **Employment Status.** Overall, most (73.4%) ASHA members and affiliates work full time; 16.7% work part time. Only 1.2% are unemployed and seeking work.
- **Primary Employment Facility—Audiologists.** Most (74.6%) audiologists work in health care settings, including hospitals and residential and nonresidential health care facilities. Most of the remainder work in either schools (7.4%) or colleges/universities (6.3%).
- **Primary Employment Facility—SLPs.** More than half (50.4%) of SLPs work in schools. Most of the remainder (39.6%) work in either health care settings, including hospitals and residential and nonresidential health care facilities, or colleges/universities (2.5%).
- **Private Practice.** About 31.8% of audiologists and 23.1% of SLPs work full or part time in private practice.
- **Primary Employment Function.** About 77.8% of audiologists and 75.3% of SLPs are clinical service providers. Most of the remainder are special education teachers, college/university professors, researchers, administrators, or consultants.

Note: The above demographic and employment data exclude National NSSLHA members.

2021 Member and Affiliate Profile

Overall Counts

ASHA currently represents 223,456 members and affiliates: audiologists; speech-language pathologists (SLPs); speech, language, and hearing scientists; audiology and speech-language pathology support personnel; and undergraduate, graduate, and doctoral students in communication sciences and disorders (CSD) who are members of the National Student Speech Language Hearing Association (NSSLHA). ASHA’s membership and affiliation grew by 5,142 people in 2021—a 2.4% increase from the previous year.

Counts by Membership or Affiliation Status

- **Audiologists, SLPs, and Speech, Language, and Hearing Scientists.** Excluding assistants, associates, and National NSSLHA members, ASHA represents 212,534 CSD professionals—up from 207,913 at year-end 2020 (a 2.2% increase).
- **Audiologists.** ASHA represents 13,910 audiologists—up from 13,727 at year-end 2020 (a 1.3% increase). Most (93.4%) audiologists are certified members.
- **Speech-Language Pathologists.** ASHA represents 193,799 SLPs—up from 188,143 at year-end 2020 (a 3.0% increase). Most (98.8%) SLPs are certified members.
- **Individuals With Dual Certification.** ASHA represents 707 individuals who hold certification in both audiology and speech-language pathology—down from 758 at year-end 2020 (a 6.7% decline).
- **Individuals With Certification in Process.** The number of individuals who have started—but not yet completed—the certification process is 3,721—compared with 4,758 at year-end 2020. The high “in process” number in 2020 was due primarily to the large number of individuals, including National NSSLHA members, who applied for certification prior to a change in certification standards.
- **Members Only.** Only 354 ASHA members do not hold certification—down slightly from 368 at year-end 2020 (a 3.8% decrease).
- **International Affiliates.** ASHA represents 541 CSD professionals from 61 countries outside the United States—down slightly from 543 professionals from 60 countries at year-end 2020 (a 0.4% decrease).
- **Certified Assistants.** ASHA represents 446 assistants—23 certified in audiology, 354 certified in speech-language pathology, and 69 who have started—but not yet completed—the Assistants Certification Program.
- **Associates.** ASHA represents 135 audiology and speech-language pathology support personnel—down substantially from 222 at year-end 2020 (a 39.2% decline). This may be due in part to the Assistants Certification Program that was initiated in 2021 and the sunseting of the Associates Program slated for December 2022.

- **National NSSLHA Members.** ASHA represents 10,341 students who are members of National NSSLHA—up from 10,179 at year-end 2020 (a 1.6% increase).

Demographics

- **Sex.** Overall, most (95.6%) ASHA members and affiliates identify as female—up slightly from 95.5% at year-end 2020. About 13.4% of audiologists, 3.6% of SLPs, and 15.9% of those with dual certification identify as male.
- **Race and Ethnicity.** About 8.7% of ASHA members and affiliates identify as racially minoritized groups. Additionally, about 6.2% of ASHA members and affiliates identify as Hispanic or Latino. In contrast, 38.4% of the U.S. population identify as racially minoritized groups; 18.7% identify as Hispanic or Latino (U.S. Census Bureau, 2020).
- **Age.** ASHA members and affiliates who are age 35–44 make up the largest share of the Association (28.2%), followed by those who are age 34 and younger (28.0%), 45–54 (22.3%), 55–64 (13.1%), and 65 and older (8.4%).

Employment Characteristics

- **Employment Status.** Overall, most (73.3%) ASHA members and affiliates work full time; 17.0% work part time. Only 1.5% are unemployed and seeking work.
- **Primary Employment Facility—Audiologists.** Most (74.6%) audiologists work in health care settings, including hospitals and residential and nonresidential health care facilities. Most of the remainder work in either schools (7.7%) or colleges/universities (6.4%).
- **Primary Employment Facility—SLPs.** More than half (50.9%) of SLPs work in schools. Most of the remainder (39.4%) work in either health care settings, including hospitals and residential and nonresidential health care facilities, or colleges/universities (2.6%).
- **Private Practice.** About 31.2% of audiologists and 22.4% of SLPs work full or part time in private practice.
- **Primary Employment Function.** About 78.0% of audiologists and 75.1% of SLPs are clinical service providers. Most of the remainder are special education teachers, college/university professors, researchers, administrators, or consultants.

Note: The above demographic and employment data exclude National NSSLHA members.

Profile of ASHA Members and Affiliates, Year-End 2020

Overall Counts

ASHA currently represents 218,314 members and affiliates: audiologists; speech-language pathologists (SLPs); speech, language, and hearing scientists; audiology and speech-language pathology support personnel; and undergraduate, graduate, and doctoral students in communication sciences and disorders (CSD) who are members of the National Student Speech Language Hearing Association (NSSLHA). ASHA's membership and affiliation grew by 7,598 people in 2020—a 3.6% increase from the previous year.

Counts by Membership or Affiliation Status

- **Audiologists, SLPs, and Speech, Language, and Hearing Scientists.** Excluding support personnel and students, ASHA represents 207,913 CSD professionals—up from 201,737 at year-end 2019 (a 3.1% increase).
- **Audiologists.** ASHA represents 13,727 audiologists—up from 13,610 at year-end 2019 (a 0.9% increase). Most (93.4%) audiologists are certified members.
- **Speech-Language Pathologists.** ASHA represents 188,143 SLPs—up from 181,628 at year-end 2019 (a 3.6% increase). Most (98.8%) SLPs are certified members.
- **Individuals With Dual Certification.** ASHA represents 758 individuals who hold certification in both audiology and speech-language pathology—down from 785 at year-end 2019 (a 1.2% decline).
- **Individuals With Certification in Process.** The number of individuals who have started—but not yet completed—the certification process is 4,758—compared with 4,765 at year-end 2019. Both years saw a sharp increase from the “in process” number in 2018, due primarily to the large number of individuals, including NSSLHA members, who applied for certification prior to a change in certification standards.
- **Members Only.** Only 368 ASHA members do not hold certification—down slightly from 383 at year-end 2019 (a 3.9% decrease).
- **International Affiliates.** ASHA represents 543 CSD professionals from 60 countries outside the United States—down slightly from 566 professionals from 58 countries at year-end 2019 (a 4.1% decrease).
- **Associates.** ASHA represents 222 audiology and speech-language pathology support personnel—down slightly from 224 at year-end 2019 (a 0.9% decline).
- **NSSLHA Members.** ASHA represents 10,179 students who are members of NSSLHA—up from 8,755 at year-end 2019 (a 16.3% increase). Note that there was a lower than usual number in 2019 due primarily to the large number of NSSLHA members who applied for certification prior to a change in certification standards.

Demographics

- **Sex.** Overall, most (95.5%) ASHA members and affiliates are female—the same as year-end 2019. About 13.7% of audiologists, 3.7% of SLPs, and 17.2% of those with dual certification are male.
- **Race and Ethnicity.** About 8.5% of ASHA members and affiliates identify as racial minorities. Additionally, about 6.1% of ASHA members and affiliates identify as Hispanic or Latino. In contrast, 27.6% of the U.S. population identify as racial minorities; 16.3% identify as Hispanic or Latino (U.S. Census Bureau, 2010).
- **Age.** ASHA members and affiliates who are age 34 and younger make up the largest share of the association (29.4%), followed by those who are age 35–44 (27.7%), 45–54 (21.5%), 55–64 (13.3%), and 65 and older (8.1%).

Employment Characteristics

- **Employment Status.** Overall, most (73.7%) ASHA members and affiliates work full time; 17.5% work part time. Only 1.9% are unemployed and seeking work.
- **Primary Employment Facility—Audiologists.** Most (75.0%) audiologists work in health care settings, including hospitals and residential and nonresidential health care facilities. Most of the remainder work in either schools (7.6%) or colleges/universities (6.7%).
- **Primary Employment Facility—SLPs.** More than half (51.0%) of SLPs work in schools. Most of the remainder (39.9%) work in health care settings, including hospitals and residential and nonresidential health care facilities.
- **Private Practice.** About 31.2% of audiologists and 21.7% of SLPs work full or part time in private practice.
- **Primary Employment Function.** About 78.4% of audiologists and 74.9% of SLPs are clinical service providers. Most of the remainder are special education teachers, college/university professors, researchers, administrators, or consultants.

Note. The above demographic and employment data exclude NSSLHA members.

Profile of ASHA Members and Affiliates, Year-End 2019

Overall Counts

ASHA currently represents 210,716 members and affiliates: audiologists; speech-language pathologists (SLPs); speech, language, and hearing scientists; audiology and speech-language pathology support personnel; and undergraduate, graduate, and doctoral students in communication sciences and disorders (CSD) who are members of the National Student Speech Language Hearing Association (NSSLHA). ASHA's membership and affiliation grew by 6,771 people in 2019—a 3.3% increase from the previous year.

Counts by Membership or Affiliation Status

- **Audiologists, SLPs, and Speech, Language, and Hearing Scientists.** Excluding support personnel and students, ASHA represents 201,737 CSD professionals—up from 191,675 at year-end 2018 (a 5.2% increase).
- **Audiologists.** ASHA represents 13,610 audiologists—up from 13,407 at year-end 2018 (a 1.5% increase). Most (93.1%) audiologists are certified members.
- **Speech-Language Pathologists.** ASHA represents 181,628 SLPs—up from 175,025 at year-end 2018 (a 3.8% increase). Most (98.8%) SLPs are certified members.
- **Individuals With Dual Certification.** ASHA represents 785 individuals who hold certification in both audiology and speech-language pathology—down from 813 at year-end 2018 (a 3.4% decline).
- **Individuals With Certification in Process.** The number of individuals who have started—but not yet completed—the certification process is 4,765—compared with 1,478 at year-end 2018. This sharp increase is due to the large number of individuals, including NSSLHA members, who applied for certification prior to the change in certification standards.
- **Members Only.** Only 383 ASHA members do not hold certification—down slightly from 399 at year-end 2018 (a 4.0% decrease).
- **International Affiliates.** ASHA represents 566 CSD professionals from 58 countries outside the United States—up from 553 professionals from 58 countries at year-end 2018 (a 2.4% increase).
- **Associates.** ASHA represents 224 audiology and speech-language pathology support personnel—down slightly from 229 at year-end 2018 (a 2.2% decline).
- **NSSLHA Members.** ASHA represents 8,755 students who are members of NSSLHA—down from 12,041 at year-end 2018 (a 27.3% decline). This significant decrease is due to the large number of NSSLHA members who applied for certification prior to the change in certification standards.

Demographics

- **Sex.** Overall, most (95.5%) ASHA members and affiliates are female—up slightly from 95.4% at year-end 2018. About 13.8% of audiologists, 3.7% of SLPs, and 17.4% of those with dual certification are male.
- **Race and Ethnicity.** About 8.3% of ASHA members and affiliates identify as racial minorities; AND about 5.8% identify as Hispanic or Latino. In contrast, 27.6% of the U.S. population identify as racial minorities; 16.3% identify as Hispanic or Latino (U.S. Census Bureau, 2010).
- **Age.** ASHA members and affiliates who are age 34 and younger make up the largest share of the association (30.7%), followed by those who are age 35–44 (27.2%), 45–54 (20.8%), 55–64 (13.7%), and 65 and older (7.7%).

Employment Characteristics

- **Employment Status.** Overall, most (72.9%) ASHA members and affiliates work full time; 18.2% work part time. Only 1.3% are unemployed and seeking work.
- **Primary Employment Facility—Audiologists.** Most (74.4%) audiologists work in health care settings, including hospitals and residential and nonresidential health care facilities. Most of the remainder work in either schools (7.8%) or colleges/universities (6.8%).
- **Primary Employment Facility—SLPs.** More than half (51.3%) of SLPs work in schools. Most of the remainder (39.5%) work in health care settings, including hospitals and residential and nonresidential health care facilities.
- **Private Practice.** About 31.4% of audiologists and 21.3% of SLPs work full or part time in private practice.
- **Primary Employment Function.** About 77.9% of audiologists and 74.4% of SLPs are clinical service providers. Most of the remainder are special education teachers, college/university professors, researchers, administrators, or consultants.

Note. The above demographic and employment data exclude NSSLHA members.

Highlights and Trends: Member and Affiliate Counts, Year-End 2018

Counts

- **Overall Counts.** ASHA currently represents **203,945** audiologists; speech-language pathologists (SLPs); speech, language, and hearing scientists; audiology and speech-language pathology support personnel; and undergraduate, graduate, and doctoral students in communication sciences and disorders.

Excluding associates and National Student Speech Language Hearing Association (NSSLHA) members, ASHA currently represents **191,675** audiologists, SLPs, and speech, language, and hearing scientists. Compared with the year-end 2017 counts (185,330), this number has increased by 6,345, or 3.4%. Of this number, 187,947 are members. A 3.8% increase was realized for SLPs; a 1.1% increase was realized for audiologists.

- **Members Only.** There are **399** members without certification, 3 more than at year-end 2017 (396).
- **Audiologists.** The number of certified *members* increased from 12,329 to **12,480** between year-end 2017 and year-end 2018, and the number of certified *nonmembers* decreased from 937 to **927**. Nonmember certificate holders constituted 6.9% of all certified audiologists at year-end 2018 compared with 7.1% at year-end 2017, 7.0% in 2016, and 6.9% in 2015.
- **Speech-Language Pathologists.** The number of certified *members* increased from 166,334 to **172,805** between year-end 2017 and year-end 2018, and the number of certified *nonmembers* decreased from 2,270 to **2,220**. Nonmember certificate holders constituted 1.3% of all certified SLPs at year-end 2018 compared with 1.3% at year-end 2017, 1.4% in 2016, and 1.5% in 2015.
- **Dually Certified Individuals.** The number of individuals holding dual certification (i.e., certification in both audiology and speech-language pathology) decreased from 849 at year-end 2017 to **813** at year-end 2018.
- **Individuals With Certification in Process.** At year-end 2018, individuals who had started—but not yet completed—the certification process numbered **1,478** compared with 1,667 at year-end 2017, 2,065 at year-end 2016, and 2,556 at year-end 2015.
- **International Affiliates.** There are now **553** individuals in 58 countries (4 fewer countries than in 2017) who affiliate with ASHA, 5 more than at year-end 2017 (548).
- **Associates.** The number of associates was **229**, compared to 233 at year-end 2017, 259 at year-end 2016, and 207 at year-end 2015.
- **NSSLHA Members.** The number of NSSLHA members was **12,041**, compared to 12,293 at year-end 2017, 11,852 at year-end 2016, and 12,110 at year-end 2015.

Demographics

- **Sex.** Males currently comprise 14.1% of audiologists, 3.7% of SLPs, and 17.6% of those with dual certification. Overall, the proportion of male ASHA constituents was 4.6% at the end of 2018, slightly less than that in 2017 (4.7%). This is a continuation of a trend from previous years. (e.g., from 4.9% in 2014 to 4.8% in 2015 to 4.7% in 2016).
- **Race and Ethnicity.** Overall, 8.2% of ASHA members, nonmember certificate holders, international affiliates, and associates are members of a racial minority (compared with 27.6% of the U.S. population, according to the 2010 Census), including 1.4% who have self-identified as multiracial (compared with 2.9% of the U.S. population). Additionally, 5.3% identified their ethnicity as Hispanic or Latino, compared with 16.3% of the U.S. population.
- **Age.** There is a fairly equal distribution among the 34 and younger, 35-44, 45-54, and 55 and older age groups (30.2%, 27.2%, 20.5%, and 22.1%, respectively).

Employment Characteristics

- **Employment Status.** Nearly three quarters (71.7%) of ASHA's membership and affiliation are employed full time; 19.0% are employed part time. Only 0.9% are unemployed and seeking work.
- **Work Setting.** Nearly three quarters of audiologists (73.6%) are employed in health care settings, including 46.2% in nonresidential health care facilities, 26.7% in hospitals, and 0.8% in residential health care facilities. Overall 15.1% are employed in educational settings, including 8.1% in schools and 7.0% in colleges and universities. Nearly one third (31.3%) are employed full or part time in private practice.

More than half of SLPs (54.2%) are employed in educational settings, including 51.4% in schools and 2.7% in colleges and universities. An additional 39.3% are employed in health care settings, including 17.1% in nonresidential health care facilities, 12.5% in hospitals, and 9.7% in residential health care facilities. More than one fifth (21.1%) are employed full or part time in private practice.

- **Work Role.** Most audiologists (77.7%) report their primary work role as clinical service provider. Less than one tenth (7.9%) hold an administrative position. A small percentage (5.5%) hold a teaching position (0.6% are special education teachers, and 4.9% are college or university professors); 2.1% are consultants; and 1.8% are researchers.

Most SLPs (74.1%) indicate they are clinical service providers. More than one tenth (12.3%) hold a teaching position (10.4% are special education teachers, and 1.9% are college or university professors); 6.8% hold an administrative position. Only 1.5% are consultants, and 0.2% are researchers.

Most individuals with dual certification (66.5%) report their primary work role as clinical service provider. More than one tenth (12.6%) hold a teaching position (5.2% are special education teachers, and 7.4% are college or university professors); 11.2% hold an administrative position. An additional 6.0% are consultants, and 1.0% are researchers.

Highlights and Trends: Member and Affiliate Counts, Year-End 2017

Counts

- **Overall Counts.** ASHA currently represents **197,856** audiologists; speech-language pathologists (SLPs); speech, language, and hearing scientists; audiology and speech-language pathology support personnel; and undergraduate, graduate, and doctoral students in communication sciences and disorders.

Excluding associates and NSSLHA students, ASHA currently represents **185,330** audiologists, SLPs, and speech, language, and hearing scientists. Compared with year-end 2016 counts (179,433), this number has increased by 5,897, or 3.3%. Of this number, 181,547 are members. A 3.8% increase was realized for SLPs; a 1.1% increase was realized for audiologists.

- **Members Only.** There are **396** members without certification, 4 more than at year-end 2016 (392).
- **Audiologists.** The number of certified *members* increased from 12,200 to **12,329** between year-end 2016 and year-end 2017, and the number of certified *nonmembers* increased from 918 to **937**. Nonmember certificate holders constituted 7.1% of all certified audiologists at year-end 2017 compared with 7.0% at year-end 2016, 6.9% in 2015, and 7.0% in 2014.
- **Speech-Language Pathologists.** The number of certified *members* increased from 160,174 to **166,334** between year-end 2016 and year-end 2017, and the number of certified *nonmembers* decreased from 2,299 to **2,270**. Nonmember certificate holders constituted 1.3% of all certified SLPs at year-end 2017 compared with 1.4% at year-end 2016, 1.5% in 2015, and 1.6% in 2014.
- **Dually Certified Individuals.** The number of individuals holding dual certification (i.e., certification in both audiology and speech-language pathology) decreased from 881 at year-end 2016 to **849** at the end of 2017.
- **Individuals With Certification in Process.** At year-end 2017, individuals who had started—but not yet completed—the certification process numbered **1,667** compared with 2,065 at year-end 2016, 2,556 at year-end 2015, and 5,993 at year-end 2014. The high number for 2014 is due to a large number of CCC-SLP applicants submitting prior to the change in standards and NSSLHA-to-ASHA conversions.
- **International Affiliates.** There are now **548** individuals in 62 countries (2 more countries than in 2016) who affiliate with ASHA, 44 more than at year-end 2016 (504).
- **Associates.** The number of associates was **233**, down from 259 at year-end 2016, but up from 207 at year-end 2015.
- **NSSLHA Members.** The number of NSSLHA members was **12,293**, compared to 11,852 at year-end 2016 and 12,110 at year-end 2015.

Demographics

- **Gender.** Males currently comprise 14.6% of audiologists, 3.7% of SLPs, and 18.4% of those with dual certification. Overall, the proportion of male ASHA constituents was 4.7% at the end of 2017, the same as 2016 (4.7%). The percentage of males continues to decrease, but at a slower rate (e.g., from 5.2% in 2012 to 5.0% in 2013 to 4.9% in 2014 to 4.8% in 2015).
- **Race and Ethnicity.** Overall, 8.0% of ASHA members, nonmember certificate holders, international affiliates, and associates are members of a racial minority (compared with 27.6% of the U.S. population, according to the 2010 Census), including 1.3% who have self-identified as multiracial (compared with 2.9% of the U.S. population). Additionally, 5.2% identified their ethnicity as Hispanic or Latino, compared with 16.3% of the U.S. population.
- **Age.** There is a fairly equal distribution among the 34 and younger, 35-44, 45-54, and 55 and older age groups (30%, 28%, 20%, and 23%, respectively).

Employment Characteristics

- **Employment Status.** Nearly three quarters (72.0%) of ASHA's membership and affiliation are employed full time; 19.3% are employed part time. Only 1.0% are unemployed and seeking work.
- **Work Setting.** Nearly three quarters of audiologists (73.7%) are employed in health care settings, including 46.6% in nonresidential health care facilities, 26.3% in hospitals, and 0.8% in residential health care facilities. Overall 15.3% are employed in educational settings, including 8.1% in schools and 7.2% in colleges and universities. More than one quarter (31.0%) are employed full or part time in private practice.

More than half of SLPs (54.6%) are employed in educational settings, including 51.8% in schools and 2.7% in colleges and universities. An additional 39.2% are employed in health care settings, including 16.7% in nonresidential health care facilities, 12.5% in hospitals, and 10.0% in residential health care facilities. Nearly one fifth (20.8%) are employed full or part time in private practice.

- **Work Role.** Most audiologists (77.6%) report their primary work role as clinical service provider. About one tenth (8.1%) hold an administrative position. A small percentage (5.7%) hold a teaching position (0.5% are special education teachers, and 5.1% are college or university professors); 2.2% are consultants; and 1.8% are researchers.

Most SLPs (74.4%) indicate they are clinical service providers. About one tenth (12.3%) hold a teaching position (10.3% are special education teachers, and 1.9% are college or university professors); 6.9% hold an administrative position. Only 1.4% are consultants, and 0.2% are researchers.

Most individuals with dual certification (65.8%) report their primary work role as clinical service provider. More than one tenth (13.6%) hold a teaching position (5.5% are special education teachers, and 8.1% are college or university professors); 11.0% hold an administrative position. An additional 6.3% are consultants, and 0.9% are researchers.

Highlights and Trends: Member and Affiliate Counts, Year-End 2016

Counts

- **Overall Counts.** ASHA currently represents 191,544 audiologists; speech-language pathologists (SLPs); speech, language, and hearing scientists; audiology and speech-language pathology support personnel; and undergraduate, graduate, and doctoral students in communication sciences and disorders. Excluding associates and NSSLHA students, ASHA currently represents **179,433** audiologists, SLPs, and speech, language, and hearing scientists. Compared with year-end 2015 counts (173,530), this number has increased by 5,903, or 3.4%. Of this number, 175,673 are members. A +4.0% increase was realized for SLPs; a +1.1% increase was realized for audiologists.
- **Members Only.** There are **392** members without certification, 17 more than at year-end 2015 (375).
- **International Affiliates.** There are now **504** individuals in 60 countries (8 more countries than 2015) who affiliate with ASHA, 36 more than at year-end 2015 (468).
- **Audiologists.** The number of certified *members* increased from 12,074 to **12,200** between year-end 2015 and year-end 2016, and the number of certified *nonmembers* increased from 896 to **918**. Nonmember certificate holders constituted 7.0% of all certified audiologists at year-end 2016 compared with 6.9% at year-end 2015, 7.0% in 2014, and 7.1% in 2013.
- **Speech-Language Pathologists.** The number of certified *members* increased from 153,967 to **160,174** between year-end 2015 and year-end 2016, and the number of certified *nonmembers* increased from 2,287 to **2,299**. Nonmember certificate holders constituted 1.4% of all certified SLPs at year-end 2016 compared with 1.5% at year-end 2015, 1.6% in 2014, and 1.7% in 2013.
- **Dually Certified Individuals.** The number of individuals holding dual certification (i.e., certification in both audiology and speech-language pathology) decreased from 907 at year-end 2015 to **881** at the end of 2016.
- **Individuals With Certification in Process.** At year-end 2016, individuals who had started—but not yet completed—the certification process numbered **2,065** compared with 2,556 at year-end 2015, 5,993 at year-end 2014, and 2,079 at year-end 2013. The high number for 2014 is due to a large number of CCC-SLP applicants submitting prior to the change in standards and NSSLHA-to-ASHA conversions.
- **Associates.** The number of associates was **259**, up from 207 at year-end 2015 and 223 at year-end 2014.
- **NSSLHA Members.** The number of NSSLHA members was **11,852**, compared to 12,110 at year-end 2015 and 10,609 at year-end 2014.

Demographics

- **Gender.** Males currently comprise 14.9% of audiologists, 3.7% of SLPs, and 18.8% of those with dual certification. Overall, the proportion of male ASHA constituents was 4.7% at the end of 2016, slightly less than that in 2015 (4.8%). This is a continuation of a trend from previous years. (e.g., from 5.5% in 2011 to 5.2% in 2012 to 5.0% in 2013 to 4.9% in 2014).
- **Race and Ethnicity.** Overall, 7.9% of ASHA members, nonmember certificate holders, international affiliates, and associates are members of a racial minority (compared with 27.6% of the U.S. population, according to the 2010 Census), including 1.3% who have self-identified as multiracial (compared with 2.9% of the U.S. population). Additionally, 5.0% identified their ethnicity as Hispanic or Latino, compared with 16.3% of the U.S. population.
- **Age.** There is a fairly equal distribution among the 34 and younger, 35-44, 45-54, and 55 and older age groups (30%, 28%, 20%, and 23%, respectively).

Employment Characteristics

- **Employment Status.** Nearly three quarters (72.1%) of ASHA's membership and affiliation are employed full time; 19.5% are employed part time. Only 1.1% are unemployed and seeking work.
- **Work Setting.** Nearly three quarters of audiologists (74.1%) are employed in health care settings, including 47.4% in nonresidential health care facilities, 25.8% in hospitals, and 1.0% in residential health care facilities. Overall 15.3% are employed in educational settings, including 8.2% in schools and 7.0% in colleges and universities. More than one quarter (30.4%) are employed full or part time in private practice.

More than half of SLPs (55.0%) are employed in educational settings, including 52.3% in schools and 2.7% in colleges and universities. An additional 39.5% are employed in health care settings, including 16.3% in nonresidential health care facilities, 12.5% in hospitals, and 10.7% in residential health care facilities. Nearly one fifth (20.1%) are employed full or part time in private practice.

- **Work Role.** Most audiologists (77.9%) report their primary work role as clinical service provider. About one tenth (8.2%) hold an administrative position. A small percentage (5.5%) hold a teaching position (0.6% are special education teachers, and 4.9% are college or university professors); 2.0% are consultants; and 1.8% are researchers.

Most SLPs (74.7%) indicate they are clinical service providers. About one tenth (12.4%) hold a teaching position (10.5% are special education teachers, and 1.9% are college or university professors); 6.7% hold an administrative position. Only 1.5% are consultants, and 0.2% are researchers.

Most individuals with dual certification (65.7%) report their primary work role as clinical service provider. More than one tenth (13.9%) hold a teaching position (5.5% are special education teachers, and 8.4% are college or university professors); 10.7% hold an administrative position. An additional 6.2% are consultants, and 1.0% are researchers.

Age^b (n = 859)	
34 and younger	0.8%
35-44	8.4%
45-54	18.9%
55-64	35.3%
65 and older	36.7%

Gender^b (n = 879)	
Female	81.2%
Male	18.8%

These counts include individuals who were ASHA members, nonmember certificate holders, international affiliates, or associates during the period and whose dues/fees were paid. The percentages are for the number of respondents (n = respondents) to that question only; percentages may not total 100.0% due to rounding.

Sources: ^aDues Notice 2015. ^bDues Notice 2017. In addition to completing their dues notice, members can also update their demographic information by contacting the Action Center at 800-498-2071, or going to www.asha.org and selecting "My Account" at the top of the webpage.

Highlights and Trends: Member and Affiliate Counts, Year-End 2015

Counts

- **Overall Counts.** ASHA currently represents 185,847 audiologists; speech-language pathologists (SLPs); speech, language, and hearing scientists; audiology and speech-language pathology support personnel; and undergraduate, graduate, and doctoral students in communication sciences and disorders. Excluding associates and NSSLHA students, ASHA currently represents **173,530** audiologists, SLPs, and speech, language, and hearing scientists. Compared with year-end 2014 counts (171,061), this number has increased by 2,469, or 1.4%. Of this number, 169,833 are members.
- **Members Only.** There are **375** members without certification, 25 more than at year-end 2014 (350).
- **International Affiliates.** There are now **468** individuals in 52 countries (the same as 2014) who are affiliated with ASHA, 55 more than at year-end 2014 (413).
- **Audiologists.** The number of certified *members* increased from 12,008 to **12,074** between year-end 2014 and year-end 2015, and the number of certified *nonmembers* decreased from 898 to **896**. Nonmember certificate holders constituted 6.9% of all certified audiologists at year-end 2015 compared with 7.0% at year-end 2014, 7.1% in 2013, and 7.3% in 2012.
- **Speech-Language Pathologists.** The number of certified *members* increased from 148,105 to **153,967** between year-end 2014 and year-end 2015, while the number of certified *nonmembers* decreased from 2,363 to **2,287**. Nonmember certificate holders constituted 1.5% of all certified SLPs at year-end 2015 compared with 1.6% at year-end 2014, 1.7% in 2013, and 1.8% in 2012.
- **Dually Certified Individuals.** The number of individuals holding dual certification (i.e., certification in both audiology and speech-language pathology) decreased from 931 at year-end 2014 to **907** at the end of 2015.
- **Individuals With Certification in Process.** At year-end 2015, individuals who had started—but not yet completed—the certification process numbered **2,556** compared with 5,993 at year-end 2014, 2,079 at year-end 2013, and 1,818 at the end of 2012. The high number for 2014 is due to a large number of CCC-SLP applicants submitting prior to the change in standards and NSSLHA-to-ASHA conversions.
- **Associates.** The number of associates was **207**, down from 223 at year-end 2014 and 258 at year-end 2013.
- **NSSLHA Members.** The number of NSSLHA members was **12,110**, compared to 10,609 at year-end 2014 and 11,907 at year-end 2013. An additional 904 NSSLHA members became ASHA members in 2015, which makes the total number of students who paid NSSLHA dues in 2015 slightly **over 13,000**. Those NSSLHA-turned-ASHA members are mostly reflected in the “In Process” category.

Demographics

- **Gender.** Males currently comprise 15.4% of audiologists, 3.7% of SLPs, and 19.2% of those with dual certification. Overall, the proportion of male ASHA constituents was 4.8% at the end of 2015, slightly less than that in 2014 (4.9%). This decreasing trend appeared in previous years too (e.g., from 5.9% in 2009 to 5.5% in 2011 to 5.0% in 2013 to 4.9% in 2014).

- **Race and Ethnicity.** Overall, 7.8% of ASHA members, nonmember certificate holders, international affiliates, and associates are members of a racial minority (compared with 27.6% of the U.S. population, according to the 2010 Census), including 1.4% who have self-identified as multiracial (compared with 2.9% of the U.S. population). Additionally, 4.7% identified their ethnicity as Hispanic or Latino, compared with 16.3% of the U.S. population.
- **Age.** There is a fairly equal distribution among the 34 and younger, 35-44, 45-54, and 55 and older age groups (27%, 29%, 21%, and 24%, respectively).

Employment Characteristics

- **Employment Status.** Nearly three quarters (71.5%) of ASHA's membership and affiliation are employed full-time; 19.7% are employed part-time. Only 1.1% are unemployed and seeking work.
- **Work Setting.** Nearly three quarters of audiologists (73.9%) are employed in health care settings, including 47.4% in nonresidential health care facilities, 25.6% in hospitals, and 1.0% in residential health care facilities. Overall 15.4% are employed in educational settings, including 8.3% in schools and 7.1% in colleges and universities. More than one quarter (30.4%) are employed full- or part-time in private practice.

More than half of SLPs (55.3%) are employed in educational settings, including 52.6% in schools and 2.7% in colleges and universities. An additional 39.3% are employed in health care settings, including 16.1% in nonresidential health care facilities, 12.4% in hospitals, and 10.7% in residential health care facilities. Nearly one fifth (19.8%) are employed full- or part-time in private practice.

- **Work Role.** Most audiologists (77.7%) report their primary work role as clinical service provider. About one tenth (8.3%) hold an administrative position. A small percentage (5.6%) hold a teaching position (0.6% are special education teachers, and 5.0% are college or university professors); 2.1% are consultants; and 1.8% are researchers.

Most SLPs (74.7%) indicate they are clinical service providers. About one tenth (12.4%) hold a teaching position (10.4% are special education teachers, and 1.9% are college or university professors); 6.8% hold an administrative position. Only 1.5% are consultants, and 0.2% are researchers.

Most individuals with dual certification (65.8%) report their primary work role as clinical service provider. More than one tenth (13.7%) hold a teaching position (5.3% are special education teachers, and 8.4% are college or university professors); 10.5% hold an administrative position. An additional 6.2% are consultants, and 1.2% are researchers.

Highlights and Trends: Member and Affiliate Counts, Year-End 2014

Counts

- **Overall Counts.** ASHA currently represents 181,893 audiologists; speech-language pathologists (SLPs); speech, language, and hearing scientists; audiology and speech-language pathology support personnel; and undergraduate, graduate, and doctoral students in communication sciences and disorders. Excluding associates and NSSLHA students, ASHA currently represents **171,061** audiologists, SLPs, and speech, language, and hearing scientists. Compared with year-end 2013 counts (160,905), this number has increased by 10,156, or 6.3%. Of this number, 167,327 are members.
- **Members Only.** There are **350** members without certification, 18 fewer than at year-end 2013 (368).
- **International Affiliates.** There are now **413** individuals in 52 countries (5 more countries than 2013) who are affiliated with ASHA, 58 more than at year-end 2013 (355).
- **Audiologists.** The number of certified *members* increased from 11,975 to **12,008** between year-end 2013 and year-end 2014, and the number of certified *nonmembers* decreased from 918 to **898**. Nonmember certificate holders constituted 7.0% of all certified audiologists at year-end 2014 compared with 7.1% at year-end 2013, 7.3% in 2012, and 7.4% in 2011.
- **Speech-Language Pathologists.** The number of certified *members* increased from 141,847 to **148,105** between year-end 2013 and year-end 2014, while the number of certified *nonmembers* decreased from 2,406 to **2,363**. Nonmember certificate holders constituted 1.6% of all certified SLPs at year-end 2014 compared with 1.7% at year-end 2013, 1.8% in 2012, and 2.0% in 2011.
- **Dually Certified Individuals.** The number of individuals holding dual certification (i.e., certification in both audiology and speech-language pathology) decreased from 957 at year-end 2013 to **931** at the end of 2014.
- **Individuals With Certification in Process.** At year-end 2014, individuals who had started—but not yet completed—the certification process numbered **5,993** compared with 2,079 at year-end 2013 and 1,818 at year-end 2012, and 1,811 at the end of 2011. Contributing factors to the 2014 increase include a large number of individuals applying for the CCC-SLP prior to a change in standards and NSSLHA-to-ASHA conversions.
- **Associates.** The number of associates was **223**, down from 251 at year-end 2012 and 258 at year-end 2013.
- **NSSLHA Members.** The number of NSSLHA members was **10,609**, compared to 11,907 at year-end 2013. An additional 2,577 NSSLHA members became ASHA members in 2014, most reflected in the “In Process” category.

Demographics

- **Gender.** Males currently comprise 16.0% of audiologists, 3.7% of SLPs, and 19.6% of those with dual certification. Overall, the proportion of male ASHA constituents was 4.9% at the end of 2014, slightly less than that in 2013 (5.0%). This decreasing trend appeared in previous years too (e.g., from 5.9% in 2009 to 5.5% in 2011 to 5.0% in 2013).
- **Race and Ethnicity.** Overall, 7.8% of ASHA members, nonmember certificate holders, international affiliates, and associates are members of a racial minority (compared with 27.6% of the U.S. population, according to

the 2010 Census), including 1.4% who have self-identified as multiracial (compared with 2.9% of the U.S. population). Additionally, 4.6% identified their ethnicity as Hispanic or Latino, compared with 16.3% of the U.S. population.

- **Age.** There is a fairly equal distribution among the 34 and younger, 35-44, 45-54, and 55 and older age groups (27%, 29%, 20%, and 24%, respectively).

Employment Characteristics

- **Employment Status.** Nearly three quarters (70.9%) of ASHA’s membership and affiliation are employed full-time; 19.9% are employed part-time. Only 1.1% are unemployed and seeking work.
- **Work Setting.** Nearly three quarters of audiologists (73.7%) are employed in health care settings, including 47.2% in nonresidential health care facilities, 25.5% in hospitals, and 1.0% in residential health care facilities. An additional 15.4% are employed in educational settings, including 8.3% in schools and 7.1% in colleges and universities. More than one quarter (30.3%) are employed full- or part-time in private practice.

More than half of SLPs (55.5%) are employed in educational settings, including 52.8% in schools and 2.7% in colleges and universities. An additional 39.1% are employed in health care settings, including 16.0% in nonresidential health care facilities, 12.4% in hospitals, and 10.7% in residential health care facilities. Nearly one fifth (19.5%) are employed full- or part-time in private practice.

- **Work Role.** Most audiologists (77.6%) report their primary work role as clinical service provider. About one tenth (8.4%) hold an administrative position. A small percentage (5.5%) hold a teaching position (0.6% are special education teachers, and 4.8% are college or university professors); 2.2% are consultants, and 1.8% are researchers.

Most SLPs (74.8%) indicate they are clinical service providers. About one tenth (12.3%) hold a teaching position (10.4% are special education teachers, and 1.9% are college or university professors); 6.8% hold an administrative position. Only 1.5% are consultants, and 0.2% are researchers.

Most individuals with dual certification (65.8%) report their primary work role as clinical service provider. More than one tenth (13.4%) hold a teaching position (5.1% are special education teachers, and 8.3% are college or university professors); 11.0% hold an administrative position. An additional 6.0% are consultants, and 0.9% are researchers.

Primary Work Role of All ASHA Constituents, Year-End 2014

Female	95.1%
Male	4.9%

These counts include individuals who were ASHA members, nonmember certificate holders, international affiliates, or associates during the period and whose dues/fees were paid. The percentages are for the number of respondents (*n* = respondents) to that question only; percentages may not total 100.0% due to rounding.

In addition to the dues notices of various years, members are also able to provide ASHA with their demographic information by contacting the Action Center at 800-498-2071, or updating their data online at community.asha.org/myprofile.

For additional information about these figures, contact ASHA's Surveys and Analysis unit at data@asha.org or 800-498-2071, ext. 8749, 8738, or 8739.
